Village Council Agenda Report

Meeting Date: Thursday, July 25, 2024

MarvinNC.gov

Title: Marvin Loop Trail Stormwater Study Update

Attachments: Report **Action Requested:** Information Only

Draft Motion: No Motion Requested

Budgetary Impact: No Budgetary Action Required

Background:

The Village recently contracted with AMT Engineering to perform a stormwater assessment study for two portions of the trail that experiences flooding on a regular basis. The study has been completed and recommendations provided to remedy the issues.

Current:

Staff met with our engineer to review the stormwater study and have determined that most of the recommendations for correcting the flooding issues fall primarily within the NC DOT right of way. Based on these findings it would be prudent to have conversations with NC DOT engineers to determine what portion of these items they are able to address. Any work performed by NC DOT should reduce or potentially remove funds needed by Marvin. However, there is the potential that NC DOT could perform their portion of the work and not remedy all the flooding issues. At that time, staff would bring forward to the council the cost of performing work on Marvin owned property. Our engineer has reached out to NC DOT engineering to start these conversations. Our expectation is to meet with them within the next few weeks.
